# ***Assumption documentation***

We have a conference that has many guests, events, organizers, authors with their papers and reviewers. The conference has an ID, a name, a start date, an end date and several locations (that consist of a city, a street and a postal code).

This conference invites many guests who have an ID, an email, a name (that consists of first name, middle name and last name) and a gender.

Each conference may have more than one event. Each event has a name, a start date, an end date and a location. Events may have several locations.

Each conference must include number of organizers who organizes the conference. Each organizer has an ID, a name, an email and a gender.

Additionally, this conference includes papers that has an ID, a name, a size and content, also keep track of number of papers.

Each paper is reviewed by many reviewers. Each reviewer has an ID, a name, a gender, an email and feedback. Also the conference has many authors who publish papers at this conference.

Each author has an ID, a name (that consists of first name, middle name and last name), an email, birthdate, age and gender.
